DIRECTIONAL COUPLERS, COAXIAL AND WAVEGUIDE, designed to produce DC or RF outputs sensitive to forward and reflected main line RF power. Your most exacting "SPECIAL" RF power measuring requirements can, in most cases, be satisfied by but a slight modification of one of our hundreds of standard models. Meet MIL Specs.

DIGITAL OR MICROPROCESSOR-Based "MICRO" LOGIC MODULES. Largest, most flexible selection in the U.S., both commercial and mil-grade models, all interchangeable. "Abacus MicroModules"™ are small (2 x 3 x 1/32 in.); available in over 350 logic types; employ exceptionally reliable, rugged 52-position miltype blade and socket/pin connectors; and mount in supplied mini card cages for wire wrap into complete systems. One year warranty. Design aids, tools, complete documentation furnished. Ask for MicroModules literature from Abacus Div., Dept. EM7, INFORMATION CONTROL CORP, 9610 Bellanca Ave., Los Angeles, CA 90045. Phone: (213)641-8520. TWX 910-328-7234.

FLEXIBLE-DESIGN MICROCOMPUTER SYSTEMS in assembled, or "kit" form; including all hardware, software; built around programmable "Abacus MicroModules",™ employing either 8080 or Z80 chips. Three basic "starter" or full OEM "Abacus MicroSystems" available in off-the-shelf designs; but concept allows nearly unlimited variety of system configurations efficiently tailored just for given application. Are supported by matching micro-development system to enable engineer to implement and check out hardware design and programming for his microcomputer. Request MicroSystems literature from the Abacus Div., Dept. EM7, INFORMATION CONTROL CORP,, 9610 Bellanca Ave., Los Angeles, CA 90045. Phone (213) 641-8520. TWX 910-328-7234.

KILOWATT AMPLIFIERS
Sub-sonic to Super-sonic freq.
500 Watts to 100 kW
All solid state - Hi Rel
5 YEAR WARRANTY
Modular Construction - Compact
Current and Voltage limited
Temperature protected
Delivers full rated VA to loads
down to ZERO power factor
Linear and Switching types
Send for Tech Memos

SCR control of power is Loyola's business, not a side line. The oldest and most experienced builder of SCR control equipment offers both phase and burst fired power control. Up to 1660 KVA is a standard catalog item for heating applications. Larger specials are built by the Systems Group. DC motor drives to 150 HP and AC reduced voltage motor starter to 300 HP are standard. Most all small and medium controls shipped from stock.

MCE offers an extensive line of standard inductors and transformers with package options. These include 60 and 400 Hz transformers, lamination type or toroidal chokes, and precision inductors. Miniature high frequency, high temperature and high voltage units for power supplies are our specialty. Complete catalogue including engineering data and prices on request.

Metron Circuit Board Comparator permits optical inspection of boards to 16" x 16". Magnified scanning areas or production and "master" boards appear simultaneously on lighted screen as mirror images flowing out of center dividing line. Errors are marked as seen on screen. For literature, write Metron Optics, Box 690, Solana Beach, CA 92075. 714/755-4477.

The "PDC" system consists of various functional modules which may be configured for virtually, any process control, data acquisition control or other microcomputer functions. Among the available modules are SCAMP, 8080 and 6800 CPU modules, RAM and PROM memory modules, parallel and serial I/O modules and ready to use rack and power supply combinations. The MilerTronics P8000 PROM programmer and DM-2000 Diode Matrix programmer support the PDC system by providing permanent memory programming capability.

Off the shelf and custom designed amplifiers, specializing in AC servo amplifiers and related modules: DC operational amplifiers and power amplifiers; professional quality audio amplifiers and special effects devices; military quality intercom equipment. If you have an amplifier requirement, check with MDI first! We probably have it on the shelf now, and if not, we're still able to reduce your engineering costs in designing it.

Omega Electric, a Division of F. & B. Mfg. Co., has been serving leaders in the electrical/electronic industry with General Purpose and Telephone Relay products for over 25 years. In addition Omega manufactures actuators, buzzers and solenoids. We not only produce relays equivalent to P & B, Guardian, Struthers Dunn, Midtex and others, but also have the research, design and production expertise for special type relays per customer requirement.

Ultra low noise (IDB typical) transistor amplifiers for use with infrared detectors and electrical transducers; voltage mode, current mode and automatic bias control. Standard models are available to match all infrared detectors and transducers produced in the U.S. and Europe. Multi-Element amplifier arrays are available in all operating modes with hybrid modules containing up to 100 signal channels.

Standard secondary function amplifiers such as; logarythmic, AGC, video, RF, etc., are also available from stock.

Advertisement

Power-Sonic batteries combine economical, rechargeable power with the handling ease of dry batteries. Sealed construction plus gelled electrolyte make batteries maintenance-free, leak-proof, and usable in any position.

FEATURES:

- Complete line ranging from 4 to 12 volt, and from 1 to 20 amp. hrs.
- Float type for standby use; Cycle type for repetitive charge/discharge operation.
- Standard dimensions and terminal configuration.
- Delivery from stock.
- Lowest prices.

Advertisement

PowerTech specializes in supplying high current, high voltage silicon transistors for military-aerospace and high grade industrial applications. Devices with current capabilities to 1600 Amperes and voltage ratings to 650 Volts are readily available. Packaging to suit individual space and weight requirements is also available. MIL Qualified devices are from stock and other devices may be processed to any MIL or Aerospace HIGH-REL Specification.
